Other performances:

Nov 2

Nov 6

Nov 8

Nov 9

Nov 10 at 7 pm

Non Linear is a long-term site specific project in which the original concept is modified according to the new space and environment. First performed in March 2014 at Suvilahti Kattilahalli, the second part will premiere Nov 1 in Jätkäsaari Harbour area.

The structure of the work is based on the spatial coexistence and temporal layering of six performance stages with nine dancers. The work is active for approximately 2 hours, during which time the audience is free to stroll in or out. The viewing direction of the stages is not predefined. It is although as if an invisible thread connected the stages; they need each other, communicating through the space.
